

EVERYTHING YOU WANT TO KNOW ABOUT **SAP Lumira**

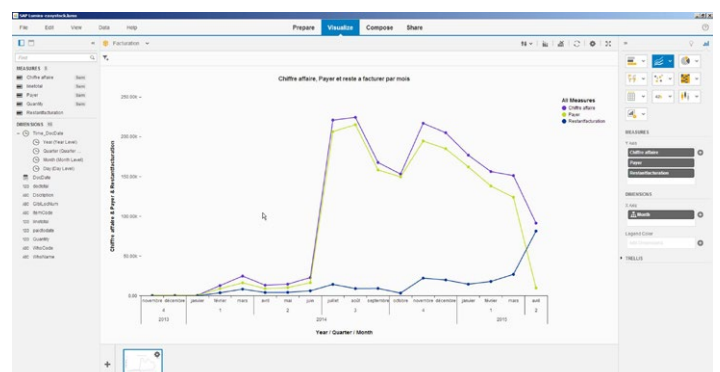

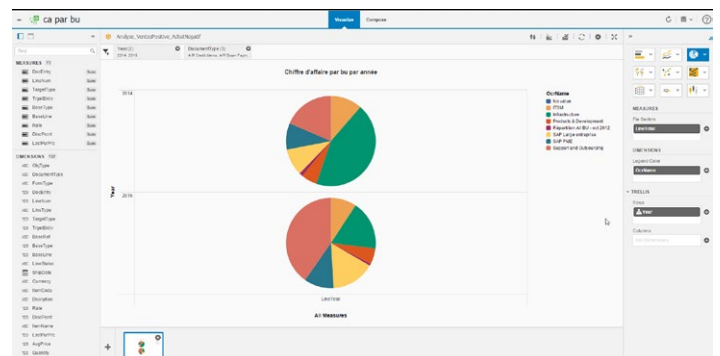

Visualize, handle, enhance and explore your data that you can collect in just a few clicks in complete autonomy with SAP Lumira. Understanding data becomes easy and helps you take quicker informed decisions.

Improve understanding of your data with an **AGILE VISUALIZATION**

You can rely on an overview as well as on the most precise details to accelerate decision making with immediate, fact-based answers to complex business questions thanks to our data visualization software.

- ▶ Real time answers whatever the volume of data is, through an interactive and visual experience
- ▶ Visualize the situation as a whole and in detail for a better comprehension of your data
- ▶ Link, consult, handle and visualize the strategic data easily

With SAP Lumira software, you can make your worksheets talk. SAP Lumira Personal Edition helps you analyze your Excel data or any other database of accountancy, logistics, HR...creating interactive visualizations in a drag-and-drop interface.

You can detect problems and anomalies immediately and have access to the details or use more data to get an overview.

- › **Analyze and visually** handle the worksheet data/databases
- › **Save** hours of data preparation
- › **Combine** information
- › **Visualize any amount** of data in real time importing data from Excel and many other sources

Don't collect data only- visualize them with SAP Lumira Standard Edition: you can increase self-service

data usage without adding to your IT department's workload.
