

PEOPLE for your SERVICES

Collaborative Services at your place

Some growth phases of a company implies the implementation of specific tools, applications and processes.

These projects, sometimes complex (migration, development of specific application, integration, upgrades...), requires competencies you might not have.

We provide case by case services customized for your environment.

Other case: the variation of the seasonality or high load of your activity makes your teams fully overloaded on a regular basis. They can hardly meet the needs of the business.

We can help you with our pool of competencies to delegate at your place or support you on a daily basis.

We are a "LSE" certified company (Swiss HR compliance).

COLLABORATION

The collaborative services compensate your temporary or recurrent lack of resources and/or competencies, putting in danger your day-to-day operations (backup, helpdesk, etc.).

DELEGATION

The resource delegation fills your sporadic or regular lack of certified knowledge when a specific solution must be deployed and which requires competences your internal teams don't have.
